Experience

Application Developer

Aug 2025 – Present

Isymply LLC

Goa, India

- Engineered full-stack features for a multi-tenant Master Data Governance platform, building responsive workflows and robust Spring Boot / SQL Server backend services across 19 enterprise modules.
- Developed scalable backend services and dynamic data-grid configurations for filtering, sorting, pagination, and column-level views on high-volume datasets, drastically reducing user lookup time.
- Enforced fine-grained, role- and model-level authorization across 60+ APIs using Spring Security ACL, JWT, and Azure AD SSO.
- Architected high-volume Excel data pipelines (validation, duplicate detection, streaming exports) handling files up to 1GB with high reliability and zero memory bottlenecks.

Frontend Developer (Freelance based)

Feb 2025 – Apr 2025

DesignableBits

Remote

- Delivered responsive, production-ready web and mobile interfaces using Next.js, React, Tailwind CSS, and React Native for international clients across athletic and consumer service sectors.
- Engineered interactive turf and venue reservation workflows, including slot availability grids, time-picker selections, and localized user booking states.
- Built reusable UI component systems and modular product showcase pages, ensuring cross-browser responsiveness and seamless client-side navigation.

Front-end Developer & Design Intern

Aug 2024 – Sept 2024

Perceptionyst Solutions

Goa, India

- Architected and delivered the responsive frontend for a QR-based check-in app for FiiRE™ Goa, serving 180+ startups across an incubation ecosystem funded over 111Cr+.
- Implemented reusable component libraries, interactive states, and optimized asset delivery for seamless mobile and desktop client experiences.
- Produced 75+ polished digital interface assets used across production releases and client-facing web applications.

Design Intern

Jun 2024 – Jan 2025

Marwari Catalyst & Nostalgia Pages

Bangalore, India

- Designed and implemented a 6-page responsive website and brand assets for a national startup pitch competition (IP2Biz) facilitating 1Cr+ in investment opportunities.
- Created 30+ interactive branded assets and digital/print portals for 5+ institutions (incl. IIT Delhi), reaching 1,000+ end users.

Projects

Bloom – AI Web App Builder

[GitHub](#) | [Live Demo](#)

Next.js, React, TypeScript, Tailwind CSS, PostgreSQL, Prisma, Gemini API, Clerk, Sandpack

- Architected a full-stack AI web builder generating and live-rendering interactive multi-file React apps inside an in-browser Sandpack sandbox environment.
- Built a real-time code-streaming UI over Server-Sent Events (SSE) utilizing Gemini 3.5 Flash with Zod schema validation, accompanied by an autonomous file-patching refactoring agent.
- Implemented secure payment and auth architectures: atomic credit-reservation billing via Dodo Payments webhooks, Clerk user auth, Arcjet prompt-injection defense, and rate-limiting.

Rupi – Idempotent Ledger System

[GitHub](#)

React, TypeScript, Tailwind CSS, Java, Spring Boot, PostgreSQL, Redis, Docker

- Built a full-stack payment ledger system with a real-time React/TypeScript dashboard connected to a high-concurrency Spring Boot backend.
- Engineered a two-layer idempotency pipeline (Redis fast-path cache + PostgreSQL transactional truth) and pessimistic row locking to ensure zero duplicates under simulated retry storms.
- Implemented token-bucket rate limiting via Redis Lua scripts with a graceful fail-open fallback mechanism.

Education

Padre Conceicao College of Engineering

Goa, India

Bachelor of Engineering in Information Technology

Aug 2021 – May 2025

Leadership & Achievements

- **Lead, Google Developer Group Goa (GDG Goa)** – Spearheaded 5+ technical community events and workshops for 300+ developers; previously **Design Lead, GDSC PCCE**, scaling reach to 1,000+ students.
- **1st Place, Techyothon Hackathon** – Designed and built an end-to-end functional crowd-control web application in 24 hours, beating 20+ competing teams.
- **2nd Place, Avinya 3.0 & Converge 2.0 (Goa DHE)** – Runner-up across 100+ participating teams in regional startup innovation and prototyping challenges.
